Professional Summary

Results-driven **Data Analyst** experienced in transforming raw data into meaningful business insights using **SQL, Python, Power BI, Excel, and ETL workflows**. Skilled in **data cleaning, EDA, dashboard development, KPI reporting, and business analysis**, with experience working with **100K+ records** and developing **30+ analytical queries, 15+ KPIs, and 8+ data visualizations**. Strong analytical mindset with the ability to **communicate insights effectively to stakeholders, identify trends, and support data-driven business decisions**.

Technical Skills

- **Programming & Analysis:** Python (Pandas, NumPy, Matplotlib, Seaborn), SQL
- **Visualization & BI:** Power BI, Advanced Excel, DAX
- **Database:** MySQL, Database Management
- **Data Processing:** Data Cleaning, ETL Workflows, Data Manipulation, Data Validation
- **Analytics:** Exploratory Data Analysis (EDA), Statistical Analysis, KPI Analysis
- **Tools & Platforms:** Git, GitHub, Jupyter Notebook, MYSQL work bench

Professional Experience

Greateway Software Pvt. Ltd.

Data Analyst

May 2026 – Present

Pune

- Designed and implemented **end-to-end analytics dashboards** analyzing **100K+ loan records** using **SQL, Python, Power BI, and ETL workflows**.
- Developed **4+ interactive Power BI dashboard** with **16+ KPIs** for real-time performance tracking of **loan demand, approval trends, customer segments, and repayment risk**.
- Built **30+ business-focused SQL queries** using **MySQL** for real-time analysis of **loan applications, approval trends, customer segments, and repayment risk**.
- Implemented **Python-based analytical models** achieving **85%+ accuracy** in identifying **loan approval and repayment patterns** using **Python and exploratory data analysis (EDA)**.
- Performed comprehensive **data cleaning and validation**, ensuring **99% data accuracy** across analytical reports and reducing **manual effort by 40%**.
- Translated **business requirements** into **actionable insights**, supporting **10+ data-driven decisions** through comprehensive loan analysis and reporting.

Projects

Banking & Loan Analytics

2026

Python, MySQL, Power BI, Excel

- Designed and implemented a **MySQL-based loan analytics solution** for data storage and analysis, handling **100,000+ loan records**.
- Created interactive **Power BI dashboards** to track key metrics including **loan applications, approval rate, loan amount, and repayment risk**.
- Developed comprehensive **visualizations** to monitor **loan applications, approval performance, customer segments, and repayment risk**, enabling data-driven analysis and decision-making.
- Implemented advanced **DAX measures** for calculating **approval rates, average loan amounts, overdue loans, and repayment risk metrics**.
- Integrated **Excel/CSV data with MySQL** to provide a comprehensive view of **loan applications, customer profiles, approval trends, and repayment performance**.
- Identified **6+ analytical insights** and developed **4+ actionable recommendations** based on **loan demand, approval performance, customer segments, and repayment risk**.

Transportation Data Analytics — Uber

2026

Python, MySQL, Power BI, Excel

- Designed and implemented a **MySQL-based Uber data analytics solution** for data storage and analysis, handling 500,000+ ride records.
- Created 5+ interactive Power BI dashboards with 20+ KPIs to track key metrics including ride demand, revenue, trip distance, cancellations, and customer/driver performance.
- Developed 10+ EDA analyses and visualizations to identify patterns and trends across ride demand, trip duration, revenue, distance, cancellations, and customer behavior.
- Implemented 40+ business-focused SQL analysis queries using aggregations, CASE statements, subqueries, CTEs, joins, and window functions to analyze ride and business performance.
- Performed comprehensive data quality checking, cleaning, validation, and outlier detection, including missing values, duplicates, invalid records, inconsistent data types, and abnormal ride values.
- Identified 6+ analytical insights and developed 5+ actionable recommendations based on ride demand, revenue, cancellations, trip patterns, and customer/driver performance.

Education

Bachelor of Computer Applications (BCA)

May 2026

Kavayitri Bahinabai Chaudhari North Maharashtra University

Jalgaon

Certifications

- Python Certification — 2025
- Data Analyst Certification — 2026
- SQL Certification — 2026
- Microsoft Power BI Certification — 2026
